Seidou's mission within the Commission:

- I think that as a candidate I can be very effective in raising awareness, training, volunteering, perseverance, discipline, respect and responsibility that falls on athletes around the world.
- Even with small means we can work hard for the development of sambo in an effective way and achieve very good results. I have experienced this myself in my life and I'm eager to share my knowledge and experience with the other athletes.
- By finding techniques to understand the philosophy of sambo, since it has become an Olympic sport, I think it is the future, and we, athletes are also responsible for it.
